Together we
transform lives

Making moving in care
safe & comfortable

smirthwaite

Together we
transform lives

Our equipment in this range is designed to make moving in care as safe and comfortable as possible for both the child/young adult and the carers. It can be used in schools, hospitals and a range of other professional healthcare settings as well as home; each product is durable and built to withstand frequent use.

We offer a variety of types including slings, overhead hoists, and showering facilities.

To provide you with extra peace of mind, our technical experts work with occupational therapists to advise on the most suitable moving and handling equipment.

Do you have any bespoke moving & handling requirements for children? Our friendly experts are here to help and offer FREE demonstrations.
