smirthwaite

Together we
transform lives

welcome

Since 1986, Smirthwaite has developed and retained its reputation as one of the leading designers & manufacturers of special needs equipment. In that time, we have dedicated ourselves to finding and providing effective solutions that offer significant benefits to babies, children and young adults in their daily lives. Working closely with children, parents, carers and therapists, we have developed a comprehensive range of seating, standing, tables, desks, toileting, bathing, changing, showering, moving & handling, sleeping, therapy and sensory products.

Innovation in our design

Special needs equipment is often overly complex, difficult to use and expensive to maintain. At Smirthwaite, we believe in well-made, easy to use products that stand the test of time. Through close consultation with leading therapists, parents and end users, we ensure our designs offer numerous clinical benefits whilst maintaining a customer-centric and innovative approach.

Easy to clean

All of our products are easy to clean. For instance, our wooden chairs have anti-microbial properties that ensure surfaces are kept hygienic. This helps to reduce any risk of cross infection and is especially useful in multi-user environments such as nurseries and schools.

All our upholstery is carefully chosen due to its clever material make up that contains antibacterial agents that help against the spread of MRSA, E coli and other bacteria.

Warranty & servicing

All of our products come with a two year warranty as standard. An inspection, maintenance, service and repair facility for all Smirthwaite products is available to you, for complete peace of mind. This can be scheduled at a time that is convenient for you.

Call our Customer Services team today on +44 (0)1626 835552 or e-mail info@smirthwaite.co.uk to book your service, inspection or repair.

Sensory integration

Sensory toys and equipment add more than fun to a child's life.

Sensory toys are also important in:

- improving behaviour
- developing better balance
- understanding and refining the senses
- improving confidence.

You can make sensory sessions enjoyable and develop motor-coordination, core balance and social skills at the same time.

Using our frames and swings, vestibular and proprioceptive stimulation can also be achieved.

To find out how you could enrich your home or workplace with our range of sensory toys and equipment please get in touch and we will be happy to explore options with you.

Try before you buy

If you are a school or nursery with an OT we can offer play day trials where we can bring a range of equipment to your school for your kids to try before you purchase. If you are interested in this please contact us.

frames& swings

Popular frames

Our popular selection of free-standing suspension systems are designed to be used in conjunction with our sensory swings, platforms and bolsters. They eliminate the need for permanent structural fixings, are made of tubular steel and can be purchased with bright, colourful padding and mats.

Range of swings

Our range of bolsters and swings are easy to attach to our frames and can be used as part of your child's sensory programme. For instance, our Flexi Bolster provides vestibular and proprioceptive stimulation through gentle rocking or pushing the bolster.

ramp & scooter

Making sensory fun

Our Ramp & Scooter set make sensory therapy fun and engaging. It can be used in sensory integration sessions to increase the different sensory levels of children. It has been designed to stimulate your child and make their sensory sessions enjoyable.

The set comprises of two varieties of ramps; one of the ramps is angled whereas the other is slightly convexed. The scooter has a flat padded surface that makes it easier for your child to lie in a prone position.

Our Ramp & Scooter set can also be used for proprioception activity, as well as refining motor co-ordination skills. The set comes with 1 x size 2 scooter as standard.
