smirthwaite
Together we
transform lives

welcome

Since 1986, Smirthwaite has developed and retained its reputation as one of the leading designers & manufacturers of special needs equipment. In that time, we have dedicated ourselves to finding and providing effective solutions that offer significant benefits to babies, children and young adults in their daily lives. Working closely with children, parents, carers and therapists, we have developed a comprehensive range of seating, standing, tables, desks, toileting, bathing, changing and showering products.

Innovation in our design

Special needs equipment is often overly complex, difficult to use and expensive to maintain. At Smirthwaite, we believe in well-made, easy to use products that stand the test of time. Through close consultation with leading therapists, parents and end users, we ensure our designs offer numerous clinical benefits whilst maintaining a customer-centric and innovative approach.

Easy to clean

All of our products are easy to clean. For instance, our wooden chairs have anti-microbial properties that ensure surfaces are kept hygienic. This helps to reduce any risk of cross infection and is especially useful in multi-user environments such as nurseries and schools.

All our upholstery is carefully chosen due to its clever material make up that contains antibacterial agents that help against the spread of MRSA, E coli and other bacteria. The Dartex upholstery on our Juni's contains Biostatic (anti-mycotic) coatings and this provides an impenetrable barrier to virus and bacteria.

For home or school

Whether for home or school, good posture is at the heart of our special needs chairs. Good posture is crucial in so many ways and our paediatric seating range offers some huge benefits:

- Correctly fitted special needs chairs help children focus on their school work or tasks at home
- Helps children to join in with their friends
- By easing pressure on the digestive system, there is less risk of pain and discomfort when eating
- By reducing the stress and strain of poor posture, children can physically and mentally relax
- All of the above can lead to a happier, more confident child.

Every child is unique and special and many of our products can be tailored to fit specific needs. Don't be afraid to ask us about customising our products for your child.

Levitex®

We recently introduced pressure care relief technology in partnership with Levitex across our seating and changing bench products. Leviext Foam is an innovation in PU foam, combining the comfort of latex with PU foam characteristics, and helps correct individual's posture and improve quality of life. The gravity defying foam technology is recommended for use in seating; it has excellent body pressure distribution and keeps soft while offering great support.

 The Levitex symbol features on all of our products where it is available as an added extra.

Warranty & servicing

All of our products come with a two year warranty as standard. An inspection, maintenance, service and repair facility for all Smirthwaite products is available to you, for complete peace of mind. This can be scheduled at a time that is convenient for you.

Call our Customer Services team today on +44 (0)1626 835552 or e-mail info@smirthwaite.co.uk to book your service, inspection or repair.

---------	----

Developed alongside input from clinical professionals, the Asiento is a strong and highly adjustable chair suitable for children from 1 year old to young adults with moderate to complex needs. Created to improve postural support and symmetry, the Asiento delivers many clinical benefits whilst being functional too.

It's durable

Accessories are attached to the chair's strong central column making the Asiento robust and sturdy.

Dynamic back

The dynamic back is great for those who have dystonic body movements. The backrest will move with the user and then gently return them to the correct sitting position.

Easy to use tray

The universal tray is easily attached to the armrests. The tray adjusts with the armrests to allow for use on all seat widths and also indepth, providing the best fit possible for all sized users.

Quiet electric hi-lo base

With the electric hi-lo base, users can smoothly raise and lower the chair to the desired height with a user-operated remote control. It's quiet too, helping those who are sensitive to sound.

Closer contact

The open design of the chassis and pushbike handles allows carers to get close to the backrest. This is especially useful for upper-limb therapy, crossing midline, administering care and calming the user after an epileptic fit or when anxious.

designed specifically for children, teenagers and adults with moderate to complex needs

New deluxe colour range

The following colour options apply to the Asiento:

Standard key features

Bodypoint harness

Adjustable side supports

Dynamic back & lap strap

Flip-up footrest & multi-positional leg rests

brookfield

SIZE 5 NOW
AVAILABLE

Increased stability

The Brookfield is a robust chair for children from 2 years old to young adults who require moderate levels of postural support when seated. The Brookfield has a unique moulded back as standard to promote central alignment whilst your child is seated.

Greater adjustability

The Brookfield offers seat height and depth adjustability. As an additional feature, the back can also be adjusted in height. This allows even greater flexibility and enables the chair to grow with your child. The Brookfield chair comes complete with moulded back, contoured seat, a buckle pelvic strap and height adjustable armrest as standard.

New size 5

The Brookfield chair comes complete with moulded back, contoured seat, a buckle pelvic strap and height adjustable armrest as standard. Available in bariatric sizes up to a user weight of 150kg. Please contact us for further details.

*Height of chair with contoured seat, the height with a flat seat is 25mm less.

brookfield hi-lo

With the addition of the electric hi-lo base, the brookfield chair reaches new heights and can be easily operated by the user or carer. We've also created the brookfield hi-lo+ which includes a Tilt-in-Space (TiS) feature for additional benefits gained from being in a tilted position.

Improved usability

The chair's excellent functionality makes it great for the classroom. Using a powerful actuator and user-operated remote control, the Brookfield hi-lo can be smoothly raised or lowered to suit various activities – improving engagement and inclusivity.

Comfortable resting position

Often with increased activity comes the need for rest. With the Tilt-in-Space functionality on the Brookfield hi-lo +, the user can be smoothly moved into a resting position without the need to transfer.

The ability to tilt back provides therapeutic benefits too, especially for resting after seizures or to help alleviate pressure in the body. With its easy to operate lever, there is no strain on the carer or therapist.

Postural support

Brookfield hi-lo has all of the postural support and customisation options featured on the standard Brookfield. This means that each chair can be adjusted to suit the unique needs of the user to help reach an optimal sitting position.

5523	2	345-545	600	600	10

Floor level support

Our Corner Chair is ideal for young children from the age of 8 months who need to develop sitting balance. During floor sitting, some children are inclined to fall back or sideways if they overstretch or lose concentration. The pommel at the front is designed to keep legs abducted to promote a stable posture.

Our Corner Chair is designed to provide support at the back and sides of children to improve their sitting balance. This encourages social interaction and allows them to engage in floor-based activities without the risk of falling over.

Maximum adjustability

The Corner Chair offers high level of adjustability in the back, side angle, side pad, headrest and pommel. This means that the chair can be positioned to suit your child's individual needs whilst also enabling the chair to easily grow with your child.

Corner Chair can be used at higher level when attached to the Ladder (Codes 4373 - 4375). Please see page 106 for details.

hardrock

Robust and durable

The Hardrock is an extremely durable and robust chair that has been specifically designed for children to young adults who are prone to rock repetitively. The Hardrock provides moderate levels of postural support and is suitable for both

Tailoring to the child’s needs

It can be a challenge to engage children with complex learning difficulties in educational and everyday activities. The Hardrock tackles this issue and offers a positive solution. It provides a safe environment and one that is conducive to learning.

Posture matters

The Hardrock uses an anti-thrust system and anterior pad to provide secure postural management within clearly defined boundaries. Thoracic supports and stabilisers are available for children who exhibit sideways motion.

Hardrock pictured with optional accessories; mobile base, extended gables, stabilisers, heel huggies and thoracic supports

heathfield

a simple chair with
lots of answers. A
favourite at school
and home

The perfect start

Heathfield is the perfect starter chair for children from 2 years old to young adults who require minimal levels of postural support when seated. Its unobtrusive design means that it fits well into nursery, school and home environments.

Meeting your child’s needs

The Heathfield and its many accessories work in partnership together to provide support and comfort for your child. We recognise that every child is different and the numerous configurations of the Heathfield will ensure that the chair is tailored to your child’s needs.

A natural choice

We believe in wood as a natural material for our chairs. Wood is extremely durable and it holds a contemporary beauty that makes it aesthetically pleasing whilst being environmentally friendly. Our timber comes from sustainable sources and offers thermal properties that make it warm to the touch. Antibacterial agents are added as part of our processing.

enhancing lives...

indiGO

Social integration

IndiGO is a smart and stylish chair, ideal for use by teenagers both at school and at home. While delivering the necessary comfort and postural support through its discreet built-in thoracics and lumbar prompt, the chair is also designed to integrate seamlessly into any classroom environment.

Promoting independence

IndiGO has been designed for teenagers with mild to moderate postural needs, who want to achieve enhanced independence from their chair. The user operated brake, for instance, puts the user in control of applying and releasing the brakes without needing assistance instantly giving them a sense of independence.

The brake can be fitted on either the left hand or right hand side.

Customisable solution

IndiGO is customisable, in either black or blue and either size 4 or size 5, to the needs of the user. For children with moderate needs, we offer a range of accessories that promote correct seating posture. A full range of accessories can be found on page 34-35. The chair has been designed with both the therapist's and the child's needs in mind. All adjustments can be made easily and mostly without tools.

for older children in school or college

 Colour Ranges
See page 80 for colour options

designed for teenagers with mild to moderate postural needs, who want to achieve enhanced independence

Choice of base and back

IndiGO now has the option of an electric hi-lo base (as pictured below and right), making height adjustments simple and easy.

IndiGO has two available back sizes: a low back and a high back. The low back has been designed with social integration in mind and is best suited to a child with mild needs. The high back is more appropriate for a child who may need a harness or extra physical support.

Pictured: indiGO on an optional electric hi-lo base with a flip-up footrest

Pictured: an indiGO on an optional electric hi-lo base with a flip-up footrest

Standard key features

Lumbar support

IndiGO's adjustable lumbar prompt allows the therapist to change the shape of the seat back in this region and provide a more comfortable position for the user.

Flip away armrest

The armrests are height adjustable and can also flip away when they are not needed. This is particularly beneficial when self-transferring from

Contoured seat

The keystone to posture management is the pelvis and IndiGO's contoured seat helps to ensure that it is correctly positioned.

Thoracic support

The thoracic supports are adjustable, with an allen key, to give the user just the amount of support they need. The lumbar is the region of the spine between the diaphragm and the pelvis, which supports the most body weight and is the most flexible.

juni

Numerous benefits

Whether in the classroom, nursery, or at home, better posture whilst seated creates a more positive experience for your child; fine motor skills develop, confidence increases and the ability to engage and learn becomes easier. The Juni comes in three vibrant colours and the contemporary appeal helps to promote social inclusion.

Posture at its foundation

Juni’s seat and backrest both provide unique contouring. This promotes better posture, gives higher levels of comfort and helps your child feel more secure and stable in the Juni. It is our vibrant chair for children who require minimal levels of postural support when seated.

Highly adjustable

We understand that your child’s needs change during each stage of growth and development. Seat height and depth as well as armrest height can all be easily adjusted. The backrest can be reclined by 5° increments (from 95° to 105°), whilst it also features an unique built-in lumbar support.

Smirthwaite's mobile base for your Juni, opens up a whole new world.

- Manoeuvre from class to class or around the home.
- Slimline and easy to use.
- Hard wearing wheels.
- Compliments the style of your Juni.

Colour Ranges
See page 80 for colour options

juni extras

We work in close collaboration with therapists, parents and children to ensure that our products meet and surpass your expectations. Through your valuable feedback the Juni also has the following optional extras: highly adjustable Juni Table, Juni Hi & Lo Boosters and Juni Hi-lo Base to overcome height issues at home, nursery & school. See all Juni accessories on pages 38 and 39.

Juni Hi-lo Base

We understand the challenges of the classroom and home environment. Height adjustment is now easy with our Juni Hi-lo Base using the gas assisted lift. The slimline footprint of the base makes this the ideal solution to fit under most classroom desks. So now, you can use your Juni chair together with the Juni Hi-lo Base by simply attaching it to the plate on top of the base; or use the chair independently where height adjustments are not needed.

Only suitable for Juni chairs size 1 & 2.

Juni extras to help overcome height issues at home, nursery & school

juni extras

Juni Table

The Juni table offers two key benefits; the legs are adjustable so your child can work or play at the correct height and the table folds, which allows for easy storage. Available in a variety of colours this is the perfect companion to your favourite Juni chair.

Juni Boosters

Our Hi Booster is perfect for the breakfast bar or for feeding your child without crouching or kneeling. Our Lo Booster allows for sitting your child at the dinner table or giving your child extra height.

Hi & Lo Boosters come complete with a black 5-point harness and are also available with castors*. The Juni Boosters accommodate Juni chair size 1 and 2 only. Please visit our websites for more details.

samba

Tailored to special needs

The Samba is a versatile chair; it can cater for a wide array of conditions (from mild to complex) and can have as much or as little posture support as required by your child.

When sitting a child in our chairs we always start at the foundation, this is the pelvis. The Samba's 4-point pelvic strap is a key feature, as it allows us to anchor the pelvis in the correct anterior tilted seated position, this can help with preventing sacral sitting and is so easy to adjust.

The Samba now comes with the new easy to use plastic tray that features on the Asiento.

Promoting postural control

If your child needs a high level of postural control we may recommend the soft cross harness. This harness promotes spine control by stabilising the shoulders, instead of the more traditional approach of using conventional laterals. For greater alignment support the Soft Cross harness can be used in conjunction with the 4-point pelvic strap.

A multi-height solution

The Samba provides an impressive seat height range of 295mm. The seat height ranges from 310mm – 605mm, this makes it an ideal solution for children that study, play and live in

Understanding posture

The Samba has an unique approach to managing posture. It does this effectively by using the contours of the seat and backrest, as opposed to hard intervention. The contouring can be tailored to the needs of your child by adding or taking away the foam inserts. The contours in the backrest have a subtle, but effective way of holding your child in a good mid-line position, without the intervention of using fixed laterals.

a versatile seating
system with a unique
midline support,
suitable for mild to
complex conditions

Tilt in space

If your child needs to be hoisted, the Samba can be tilted back, this is to enable a safe and controlled transfer, even if your child extends. The tilt in space is easy to operate by using the safety catch and the lever.

Standard key features

Controlled tilt

4 point pelvic strap

samba hi-lo

With the addition of the electric hi-lo base, the samba chair reaches new heights and can be easily operated by the user or carer.

Postural support

Samba hi-lo has all of the postural support and customisation options featured on the standard Samba, meaning that each chair can be adjusted to suit the unique needs of the user to help reach an optimal sitting position.

Height

The Samba hi-lo provides an impressive seat height range of 440-645mm on size 1 and 440-640mm on sizes 2-4. This makes it an ideal solution for children and teenagers that study, play and live in multi-height environments.

Usability

The chair's excellent functionality makes it great for the classroom. Using a powerful actuator and user-operated remote control, the Samba hi-lo can be smoothly raised or lowered to suit various activities – improving engagement and inclusivity.

strato

Meeting your childs needs

Every child is different. Strato provides maximum adjustability to meet both the needs of the child and the education environment. Strato’s seat, lumbar prompt, armrests and footrest, all provides a wide range of adjustments without the need for tools e.g. the gas assisted height adjustment. The chair also has an easy to read adjustment indicator to record user settings.

Space Saving

Strato has been designed with a slim line footprint to ensure it slides neatly under desks and tables. You will be amazed at how much space you can save both in the class and at home.

Taking a different angle

Strato is an innovative classroom chair designed for children and young people from 2 years to young adults who are able to get in and out of their chair independently, but require minimal to moderate postural support when seated.

Strato seat

The uniquely contoured seat tilts forward to encourage anterior tilt of the pelvis for improved hip stability as well as trunk and lower limb alignment. The design based on the concept of ‘straddle’ not ‘saddle’, also aims to enhance function and cognitive development.

“Strato promotes a secure and stable forward leaning functional posture with an extended rather than flexed spine.”

Pauline M Pope FCSP MSc BA SRP

supro

Three in one

The Supro provides the option of supine, prone and vertical standing in one frame. Its design gives an angle range of 90° allowing it to achieve a horizontal and vertical position.

Fully supportive

The Supro is a unique supine stander that has been designed for children from 2 years old to young adults who need to develop and maintain their ability to weight bear. It offers full posterior body contact and is suitable for children with little or no head control.

Highly adjustable

The Supro offers high levels of adjustment in the knees, hips and chest to meet a wide range of postural needs. The Popliteal pads provide support behind the knee when the child is not fully able to straighten their legs.

whirl

Newly designed

The new and improved Whirl enables children from 12 months old to young adults to gradually develop and maintain their ability to weight bear by promoting excellent symmetry. It is suitable for children who require lower to higher levels of postural support and control. The Whirl is ideal for both school and home environments.

Collaborating with you

Through working and collaborating with you, we have revolutionised the Whirl. We have adopted the essential elements of what your child needs from a stander; it provides excellent symmetry, it is extremely easy to use, it has multiple adjustments and, importantly, it is one that your child will enjoy using!

Supportive

The Whirl offers high levels of adjustment. Anterior, pelvic and knee supports are height, width and angle adjustable to achieve correct positioning. Pelvic obliquity can be managed through the pelvic support, which incorporates a de-rotational feature. A flip-up footrest completes the package.

COMING SOON... orbit

Four in one

The new 4-in-1 Orbit stander supports various postural positions: prone, supine, upright, and 30° abduction.

Features & benefits

The stander allows for any position to be achieved, easily switching from supine to prone to cater to the child's needs. This can enhance circulation, respiratory and digestive functions, while also promoting bone and muscle growth.

A variety of comfortable and supportive headrests are available to ensure optimal head positioning for children with complex needs.

Each leg features individual abduction, which research indicates can help prevent or slow down hip joint subluxation or dislocation. Additionally, the abduction brackets can be adjusted independently to accommodate asymmetric postures.

Innovative foot supports enable a wide range of foot positioning, including pronation, supination, dorsiflexion, and plantarflexion.

The stander comes with an electric base which can be detached for convenient transportation.

The chest pad and hip pad can rotate to provide optimal control of posture through the pelvis and trunk.

Any 3-in-1 stander can be easily transformed into a 4-in-1 model to allow for abduction.

Orbit sizing

Orbit is designed to accommodate users ranging from 900mm to 1800mm, available in three different sizes. An optimal fit can be attained through interchangeable accessory sizes, continuous adjustments, asymmetrical modifications, and the ability to adjust the setup while the child is positioned in the stander.

orbit

Orbit sizing

Orbit is designed to accommodate users ranging from 900mm to 1800mm, available in three different sizes. An optimal fit can be attained through interchangeable accessory sizes, continuous adjustments, asymmetrical modifications, and the ability to adjust the setup while the child is positioned in the stander.

the name 'Orbit' was
chosen by our
designer, as the stand-
er involves rotation and
movement

Benefits of standing with Orbit

The Orbit allows for versatile positioning, enabling easy transitions between supine and prone stances based on the child's needs. This adaptability can enhance circulation, respiratory function, and digestion, while also promoting the development of bones and muscles.

hi-riser

Robust yet slimline

Hi-Riser is an electrically operated wall-mounted changing table that is suitable for children and adults of up to 200kg. Despite its robust structure, the Hi-Riser has a slimline design that ensures it fits easily into most environments.

Easy transfers

The Hi-Riser has been designed so that it can be used with most mobile or ceiling hoists. The unique safety side rail stows away, streamlining access for transfers from a wheelchair, shower and toileting chair. The Hi-Riser also benefits from an impressive travel range of 600mm.

Providing options

We understand that every need is different, which is why the Hi-riser comes in seven different sizes that cater from young children through to adults. The Hi-Riser comes in a cream powder coated frame for dry environments or stainless steel frame for damp environments.

Technical data

- Electrically operated
- Wall and floor mounted
- Wall mounting kit included
- Weight capacity of 200kg
- Impressive travel range of 600mm

easi-lift changing bench

No floor fixing

Most height-adjustable changing tables require fitting to both the wall and floor. The Easi-Lift Changing Bench has been designed to require wall fixing only. This is particularly beneficial where the type of floor, surface pipe work or cabling prevent floor installation.

Reduces back injury

The Easi-Lift Changing Bench has a travel range of 500mm to meet varying needs and the bench can easily be set to a safe and suitable working height to help prevent the risk of back injury to the carer.

Space saving design

Easi-Lift Changing Bench is a compact, electrically operated wall-mounted changing bench designed to fit in a dry room environment where space is at a minimum, folding away to save space after use.

Technical data

- No floor fixing required
- Weight capacity of 150kg
- Travel range of 500mm
- Protrudes 305mm from the wall when stored

easi-lift shower stretcher

Easy adjustment

The Easi-Lift Shower Stretcher has been designed to help you move the user up and down with ease whilst they are on the stretcher. It is electronically operated with a height range of 500mm, which allows a safe and suitable working height to prevent the risk of back injury to the carer.

Contemporary design

The unobtrusive and neutral design of the Easi-Lift Shower Stretcher allows it to fit into a wide range of environments, especially with its stainless steel and powder coated frame. The need for floor fixing has been eliminated making it the perfect choice for areas where the floor type, surface pipe work or cabling prevent floor installation.

Easy storage

The compact design coupled with the ability to fold the stretcher away when it is not in use makes this the ideal product for times when space is limited.

Technical data

- No floor fixing required
- Weight capacity of 200kg
- Travel range of 500mm

shower stretcher

Economical solution

The Shower Stretcher Fixed Height is our entry-level product and an economical washing and showering solution for the user. This durable and slimline product represents real value for money.

Makes bathing easier

The Shower Stretcher Fixed Height is designed to allow the washing or showering of the user whilst in a horizontal position. It can be fixed directly above a bath making it the perfect solution for the home.

Added headrest

The Shower Stretcher Fixed Height, along with all of our shower stretchers, can be enhanced with the optional integral vinyl headrest. The headrest features a paddle lift adjustment, which allows it to be locked securely into the desired position.

Technical data

- No floor fixing required
- Permanently fixed at the desired height

mobi changer

Room to room

The Mobi Changer is a fully mobile changing table that requires no installation or fixing. Its compact and slimline design means it can be easily manoeuvred from room to room, offering an extremely cost effective option for multi-transfer or multi-user environments.

Height adjustable

The electrically operated Mobi Changer provides an excellent travel range of 480mm and can be lowered and elevated at the touch of a button. Safe and suitable working heights can be easily achieved which helps prevent the risk of back injury to the carer.

Easy transfers

The Mobi Changer has been designed to ensure sufficient clearance for a wide number of hoists. Its mobility and unique stowaway side rails enable safe and easy handling. Whether you are transferring from a bed, wheelchair or toileting chair, the Mobi Changer is the perfect solution.

Technical data

- Cream powder coated frame for dry rooms
- Stainless steel for damp room environments
- Weight capacity of 227kg
- Travel range of 480mm
- Comes with a wall mounted charger and 2 batteries

mobi shower trolley

Safe showering

For many children and adults, conventional methods of bathing and showering can be difficult and even hazardous. The Mobi Shower Trolley is a powered, height-adjustable shower trolley specifically designed to enable the user to be safely and easily washed or showered by their carer.

Reduces back injury

The Mobi Shower Trolley offers a range of height adjustments to enable the carer to shower and change the user at a safe and suitable working height. This reduces the risk of back injury for the carer.

Stowaway side rails

The Mobi Shower Trolley has been designed with two unique safety side rails that can be easily stowed away beneath the trolley. This allows maximum clearance for safe, easy transfer and use.

Technical data

- No installation required
- Length of table is 1800mm
- Weight capacity of 220kg
- Travel range of 460mm

changing & showering

optional accessories

Headrest
CODE Please refer to product

Our 3 shower stretcher products can all be enhanced with the optional integral vinyl headrest. The headrest must be ordered at the same time the stretcher is ordered and cannot be fitted retrospectively. Our frames have been designed with the ability to have the headrest at each end of the stretcher (please specify which end, at point of order). The headrest features a paddle lift adjustment, which allows it to be locked securely in the desired position.

Safety guard
CODE ECSG01

Enhance the safety of any of the 3 shower stretcher products with the safety guard accessory. The safety guard must be ordered at the same time the stretcher is ordered and cannot be fitted retrospectively. The safety guard locks securely into position and provides extra support whilst the user is on the stretcher. Please note that the safety guard does not stow away (as per the Mobi changer). The safety guard is one size in length (1400mm).

Angled back
CODE BE002 (size 1), BE003 (size 2) and BE004 (size 3)

The angled back is only available for the powder coated Mobi changer and must be requested when placing an order, as it cannot be fitted retrospectively.

Additional charging station & battery
CODE CB008 (charger & battery)
CODE BE005 (battery only)

Summary of product suitability depending on room environment

Environment	Suitable Products
Dry room environment	Powder coated benches (PC mobi, easi-lift & hi-riser)
Damp room environment i.e. bath/changing rooms (not for use with direct water)	Stainless steel benches (SS mobi & ss hi-riser)
Wet room environment i.e. walk in shower	Shower trollies, easi-lift shower stretcher & hi-riser shower stretcher
